Tania Moloney
AUTHOR

Tania Moloney is the Founder of Nurture in Nature Australia and a and a nature-loving Mum on a mission.

Since 2012 she has been working with educators and parents all over the world to help them nurture strong connections with nature and each other.

She presents at national and international conferences, leads engaging professional development programs for educators, and runs innovative nature play and outdoor learning programs in her mobile classroom, The Nature Bus.

Through her work, Tania teaches children that taking even the smallest actions to care for their nearby nature can make a positive difference for the planet, while helping them to grow and thrive too.

This is Tania's debut children's book, but she has secretly wanted to be Nature Ninja ever since she was 6 years old. Now she can be!
